STORMSACK PLUS

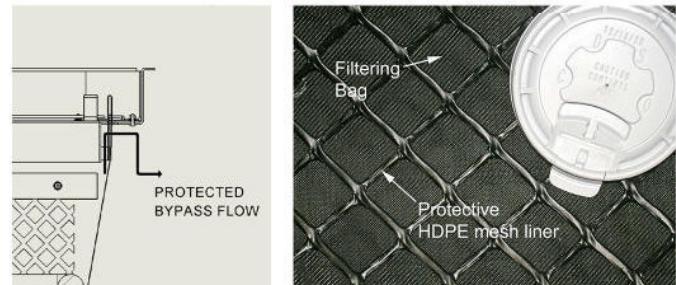

The StormSack Plus is a catch basin insert, designed to rest right below the grate. Alternate flange configurations available for combination inlets as well as frames that support the grate on only two sides. The StormSack uses a replaceable geotextile filter bag with an AOS of 40 US Sieve, capturing particles larger than 0.425mm.

The StormSack Plus is easily distinguishable from other inserts due to its heavy-duty construction and unique filter bag. Some of the unique and innovative features available on the StormSack Plus:

FEATURE SUMMARY:

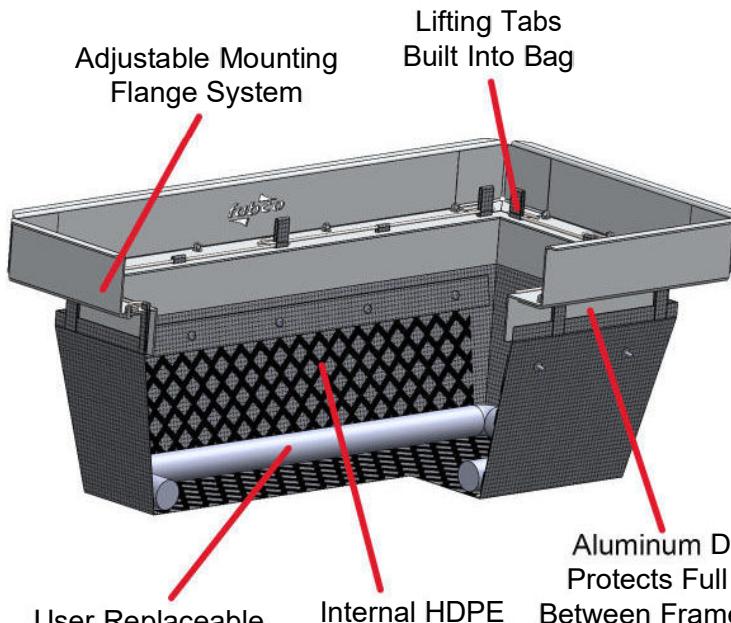

- Geotextile Filter Bag Featuring HDPE Mesh Liner
- Included Oil Boom
- Protected Bypass
- Adjustable Flanges

The Plus frame is available in 2 configurations:

SLOTTED FLANGE:

- 1" Adjustability for Each Flange
- Any Increment
- Sack Lifting Tabs
- Sacks Mount with Rod

DOVETAIL FLANGE:

- 2.5" Adjustability for Each Flange
- 1/2" Increments
- Lifts from Corner Brackets
- Sacks Mount with Clips
